

Ultravation®

UVC-Advantage™

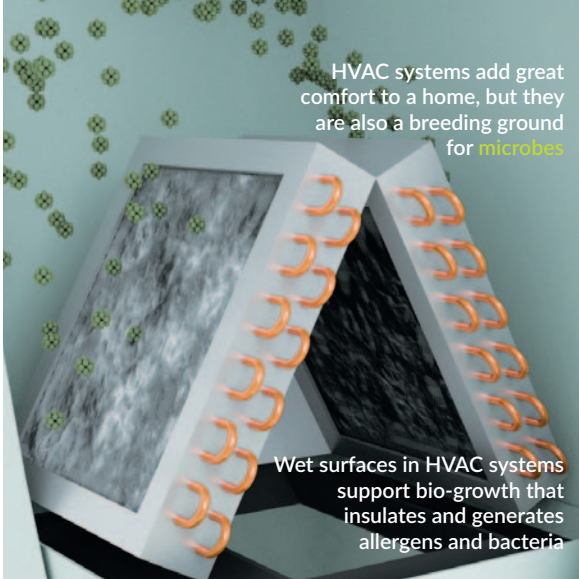

UV Light for HVAC Interior Surface Disinfection
Innovative compact one-piece integrated design

*Enjoy fresher, more
allergen-free air*

*Saves Energy • Reduces HVAC wear and tear
Fits any central air conditioning system.*

Ultravation®

Better Air | Better Water | Better Living™

HVAC systems add great comfort to a home, but they are also a breeding ground for **microbes**

Wet surfaces in HVAC systems support bio-growth that insulates and generates allergens and bacteria

Bio-growth infested HVAC cooling

Did you know?

Your HVAC system can become the source of high concentrations of allergens, released from internal bio-growth.

Even a thin bio-film measuring just a few thousandths of an inch on a cooling coil can reduce HVAC efficiency by 30% to 50% – as well as cause musty HVAC odors.

As an HVAC system distributes cooled air, it also distributes airborne microorganisms throughout a home, including bacteria, viruses and allergens.

**Use the power of UV light
to your advantage
with UVC-Advantage™**

Ultravation®
UVC-Advantage™
 Germicidal UV-C Light for HVAC

- **Stops the bio-growth** laden sludge that clogs HVAC drain pans and drain lines.
- **Allergy and musty odor relief!** Reduces or eliminates allergens and odors generated inside the air conditioner.
- **Kills bacteria and viruses** in the HVAC airstream as they pass through the intense germicidal UV-C light.
- **Optimizes cooling and energy efficiency!** UVC-Advantage prevents the bio-film that insulates cooling coils, degrading cooling efficiency. With UV, your HVAC system works less hard, reducing energy use and wear and tear.

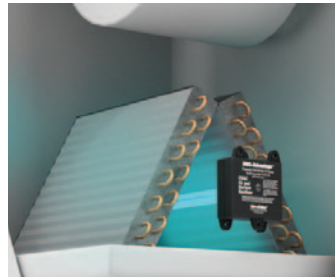

*For fresher, cleaner
 & healthier air!*

An integrated UV Light module!
Prevents HVAC bio-contamination / Kills airborne germs

UVC-Advantage!

It clears your HVAC system of bio-contamination using germicidal UV-C light, a natural disinfectant. It also kills bacteria and viruses in the HVAC air stream. **The result is healthier air and improved HVAC efficiency!** UVC-Advantage prevents bio-growth on interior HVAC surfaces and keeps the cooling coil clean and efficient 24/7. Engineered for efficiency so the lamp and power supply form one unit. As an integrated UV light system both lamp and electronics are renewed at every lamp change!

UVC-Advantage's small size allows for flexible mounting in the air conditioner. It will disinfect coil, drain pan, blower and other surfaces.

With UVC-Advantage, colds, sniffles and allergic reactions can be significantly reduced

Features

Germicidal UV	9,000 or optional 18,000 hr. lamp life
Integrated design	One-piece powered UV lamp
Increased HVAC efficiency	Up to \$30 in energy savings per year
12" or 17" lamp	Fits any HVAC system
Optional magnet mount	Convenient mounting system
Mounting plate	Galvanized steel for duct board and attaching options
No ozone	UVC-Advantage UV modules emit no ozone

Models / Options

ADV1224	12" lamp with 9,000 hr module life
ADV1224-T3	12" lamp with 18,000 hr module life
ADV1724	17" lamp with 9,000 hr module life
ADV1724-T3	17" lamp with 18,000 hr module life

How to buy UVC-Advantage

UVC-Advantage™ is sold and installed by HVAC Professionals

Proper integration of Ultravation® IAQ products into an HVAC system takes the expertise of an HVAC contractor, who can evaluate IAQ improvement needs and HVAC equipment to determine the best IAQ product(s) to accomplish your goals. This will assure optimum performance for the entire system.

Call your favorite HVAC contractor today!
