We are inspired by the needs of consumers and the expertise of professional contractors to create, design, and build innovative solutions.

AprilAire is Healthy Air.

5-year warranty on all installed products

Designed & Assembled in the USA

utilizing U.S. and Global Components

What is Radon?

Radon is a naturally occurring gas formed by the breakdown of uranium in rock and soil and is known to impact the health of the occupants if it enters into a home. Because it's odorless and colorless, it isn't easily detected by smell or look, making it possible to rise to dangerous levels unknowingly. **With radon being the #1 cause of lung cancer in nonsmokers, it's incredibly important to know whether you and your family are being exposed to high levels of radon gas.**

Put Radon on Your Radar

Proactively testing for radon—at least once per year—is a habit worth practicing, giving families the peace of mind they need. DIY test kits are inexpensive and easy to use, making radon testing as simple as changing an air filter. AprilAire Healthy Air Professionals can provide the turnkey solution you need to keep your family safe.

Trust the Experts

AprilAire has been providing trusted solutions for a Healthy Home since 1954. And AprilAire is the only company with a partner network large enough to not only test and mitigate radon but also help supply customers' homes with fresh, clean, Healthy Air.

Get Your Home Tested for Radon

Testing for radon isn't just a one-time obstacle between a homebuyer and their dream home. It's a necessary part of homeowner maintenance.

Have your AprilAire Healthy Air Hero help place test kit(s) in your home's lowest levels to check for the presence of radon. The kits will be sent out to our lab partners for analysis.

If the results you receive indicate high levels of radon, your AprilAire Healthy Air Hero will work with you to discuss options for removing radon from your home.
